Jobs

Appgradera AB, Skövde

mar 2014 –

Founder of Appgradera AB. Participated in project planning and design of software products. Wrote a big part of the code in most of the projects.

Developed products include web apps, mobile apps and desktop programs. ASP.NET MVC with AngularJS were most often used for web apps, WPF for desktop programs, and mobile apps were written in both native and Cordova.

Education

Bachelor Degree in Dataology (120p), University of Skövde

aug 2012 – jun 2015

Game development - programming as main subject. Gave me a lot of practical knowledge, especially during two large group projects as programmer lead. Read programming in C++/C#, database systems, operating systems, assembly etc.

Data technological program, Gothenburg's Technical Institution

aug 2009 – jun 2012

My high school program where I grew an interest in program. about programming in C++, local networks, computer communication and more. Participated in the national programming Olympics 2012 for high school students, and ended up in 16th place.

Programming Knowledge and Skills

Really good skills: C#, F#, Java, C++, HTML5, CSS3, Javascript, MS SQL, MySQL, ASP.NET MVC, WPF, Cordova, AngularJS, NUnit.

Good skills: Objective-C, PHP, KnockoutJS.

Has used and developed on Windows, OS X and Linux.

Language

Swedish, native language

English, very good at writing, rather good at speaking
